• **OTTAWA STUDIES BRAIN-WASHING:** Indicating deep Ottawa interest in the Communists' technique of brain-washing prisoners of war and others to break their will and resistance was the experience last week of a Montreal veterans' group. In search of a speaker for one of its gatherings, it approached a McGill professor and asked him to speak on brain-washing. They learned with some astonishment that Ottawa has been, through scientists here and elsewhere, doing a great deal of research on the subject, and that practically all information relating to it is classified. The professor stated he would have to clear his talk with Ottawa, and so little of what he knew would be cleared for utterance that the talk would be boring.
